Dear Flexible Solutions

We are owners of an odd shaped gunite pool. We have tried multiple heat saver covers and because the shape, covers became a problem. Manual roller covers and automatic covers would not work.

Flexible Solutions is a company that offered their Heatsavr Product. It has worked wonders for our pool and there is no need to deal with covers. It does a wonderful job of keeping the heat in. We have also noticed that our heater only runs a quarter of the time that it originally did with the Heatsavr Product.

It is virtually maintenance free. I would recommend this product to anyone who is looking for saving money on their heat bill and who hates to use solar covers. You spend more time enjoying your pool, then dealing with the hassles! Thank you Flexible Solutions!
